

THE LIL' BITS SERIES: VERMILLION'S CHILDREN

Jolley Elementary top readers stand in front of the board displaying their goal of 1 million minutes for the school year. Top row, left to right: Bodie, Hannah, Breanna, Kara, Anna, and Basmala; Bottom row, left to right: Mckenzie, Rollie, and Bella. Last names were left out for privacy purposes.

SARAH WETZEL / FOR THE PLAIN TALK

Reading is Jolley Good Time

By Sarah Wetzel
For the Plain Talk

Students at Jolley Elementary are in the middle of a reading program that will put them on the map.

"We have the kids read a bunch of minutes every day," said Mackenzie, fifth-grader, school cheerleader and book-lover. "Our goal is 20 every day. What we want to do is work together and get a million minutes and make history."

Even if a million minutes is not reached, Mackenzie said the program will still have benefited them.

"We just really want kids to read," she said.

Why read?

A group of star readers at Jolley shared why they know reading is important.

"You get to learn about stuff that is really important from books," said Bella, grade three. "You can learn how volcanoes work or how to make stuff."

"There's a couple of reasons why reading is important," said Bodie, grade five. "One of the reasons is it really boosts my vocabulary. Sometimes I'll experience new words and I don't know it but I'm actually learning that word."

"Before I started reading there were some words I came across that I didn't know their definition but now I know pretty much every word I come across that I wouldn't know if I didn't read."

Bodie offered a tip to those also looking to discover the meaning of new words in a book.

"There's normally context clues like you can look around the passage to see what the meaning is," he said.

"I think reading is important because you want to get into a good college," Basmala, grade five, shared. "Reading helps your grades in spelling and writing."

Basmala wants to attend Harvard in the future and study law.

Anna, grade five, pointed out that reading isn't just useful in spelling and writing.

"You use reading in every single subject," she said. "In math you use story problems and in science you're reading out of the textbook, same in social studies. You use reading everywhere all the time."

Bodie agrees with Anna. "You really don't notice this but all around you there's words everywhere and if you don't know these words it's hard to get around," he said. "There's words on trucks, there's words at school. Like Anna said there are words in books you need to read. Reading helps that you understand it a little bit more."

Movie or book?

In an age of book-to-movie entertainment, the readers shared their thoughts on books vs movies.

Hannah, grade four, said she prefers the written word. "I like reading the book more because it might have more in the book than the movie," she said.

Bella agrees.

"I like reading the book more because there might be

some secrets in the book that you don't even know about in the movie," she said.

Breanna, grade four, also said that in her experience books give you more knowledge.

Rollie, grade two, prefers books with some exceptions. "I would read the book because it might have some more juicy details," he said.

"How to train your dragon 2 is really good so I'm going to have to go with the movie on that one."

Mackenzie enjoys the unique perspective that is offered by reading that you don't get through movies.

"When you read the book you get a feel for all the people instead of just one person's point of view," she said. "So you get the feeling and you get deeper into it."

What if someone doesn't like reading?

The students at Jolley are committed to sharing their love of reading especially with those who have not discovered the joys of it yet.

Rollie finds it unbelievable that someone could not enjoy a good book.

"If someone comes up to you and they say, 'Do you like reading?' and you say, 'Yeah,' and the other person says, 'No,' you say 'What?! I love reading!'" he said.

According to Bodie, he would turn into a teacher.

"If someone told me that [they didn't like to read] I would take out a book and say 'Here's your homework,' and shove it in their chest and say 'You have to read that by tomorrow,'" he said. "Once you start reading books you get interested in them. You might think at first it will be boring just looking at words on the page but really once you start reading books more and more often, it gets more fun and you can actually experience it."

"You grow more attracted to it."

Anna would use more of a persuasive channel to convince someone to pick up a book.

"I would say to them, 'Well if you don't read you might not get into a better college and then you might not make as much money,'" she said.

Bella would point out that reading can be productive as well as enjoyable.

"Some books, like nonfiction books, you can learn from," she said.

Characters to admire According to the students, there are many characters they have connected with through their reading experience. They shared who they would like to meet if the books came to life.

Mackenzie would turn to the Hunger Games.

"Katniss Everdeen because I really admire her and think she's a really cool person for what she does," she said.

Basmala would like to meet the star of the Percy Jackson and the Olympians series.
