XADO SMART NANOTECHNOLOGY FOR YOUR CAR *ceramic metal treatment*

FOR ALL GAS & DIESEL ENGINES

\$54.99

ONE TREATMENT LASTS 60,000 MILES
60K MILES
COST EFFECTIVE!

HOW IS XADO REVITALIZANT DIFFERENT FROM OIL ADDITIVES?

Most oil additives consist of heavy oil mixed with microscopic particles of plastic (PTFE). The problem is these particles settle everywhere—in filters, oil lines, and other places they should not be. This can be dangerous for your car.

XADO Revitalizant treats metal—not oil. It only works where there is enough friction to activate it. So it works where it is needed without interfering with oil lines and filters.

XADO's self-regulating nano-technology does not cake, flake or clog.

RESTORATION OF THE WORN SURFACE OF THE BEARING

This is a photo of a defect. The defect was made on the bearing with the help of an engraving cutter. After the application of the revitalizant the defect is eliminated through formation of the protective ceramic-metal coating.

The worn metal surface is restored! And it will serve

4-times longer

than new one

FOR GEAR BOXES
Atomic Metal Conditioner MAXIMUM TRANSMISSION \$34.45

NEW

Revitalizant is a nanochemical substance working on the level of nanocoatings, it restores metal in metal-to-metal friction zones and protects them against future wear. Revitalizant has no analogs in the world. In 1999 XADO began mass production of Revitalizants and other unique Revitalizant containing products.
